Francis Rubio

Web developer. Web designer. Educator.

Summary

I develop robust and accessible front ends on the Web. I dedicate myself to educating people on web development as well as building things on the Web. Learning is what I do best.

Experience

ICT teacher, Governor Andres Pascual College
Navotas City, July 2019 - December 2020
Work included training high school students on building their first web sites, as well as preparing learning and assessment materials.

Web developer intern, Z.Com
Makati City, July - August 2018
Work included translating mockups and designs into actual web sites, working on the back end that uses Wordpress, and editing site metadata.

Freelance web developer
2017 - Present
Work includes designing and developing web sites. Most front ends are started from scratch, with backends using frameworks such as Wordpress and CodeIgniter.

Education

B.Sc. in Computer Science
University of Caloocan City (graduated 2019)

Projects

Antares Programming
November 2018 - Present
A project aiming to provide accessible web development learning resources to Filipino developers.
https://antaresprogramming.github.io/

Quantarks
2018 - 2019
An augmented reality application for Android devices that serves interactive content for teaching Chemistry in high school settings.
